SATELLITE APPLICATIONS CATAPULT – CONNECTED CAPABILITIES NETWORKS

- **EARTH OBSERVATION NETWORK FOR SUSTAINABILITY – UK-EONS**
 - Lead: Space Hub Yorkshire
 - CCN will advance the reach and impact of space data and technology across the UK with a focus on Earth observation technology for sustainability challenges. UK-EONS will work with stakeholders across space and adjacent sectors, and host engagement events and activities to help catalyse collaboration and investment opportunities.
- **CONNECTED AND AUTONOMOUS EARTH CAPABILITIES NETWORK**
 - Lead: Harwell (STFC)
 - Integration of space into multiple connectivity and autonomy services will include in the first instance:
 - Mobility, Navigation and Transportation
 - 5G/6G Non-Terrestrial Network (NTN)/Terrestrial Network (TN) Convergence
 - Photonics and Optical Communications
 - Quantum & Artificial Intelligence (AI)
 - Satellite Broadband
 - Build on our existing knowledge and bring in new sectors to create innovative solutions that will drive forward commercial benefit across the whole of the UK.

'A thriving, engaged and collaborative Space cluster for the East of England. Space East is an **industry focussed, supportive community** of businesses, academia and public sector organisations. It seeks to **promote opportunities** in the space sector and **connect stakeholders** to take advantages of these opportunities. Through providing a **platform to work together, knowledge sharing** and **access to funding streams, skills development** and **business support**, we will create an **innovative community** that **support business growth, create jobs** and deliver added value to the local and UK economy. We will become the **go-to community** for companies wanting to access the space sector in the East of England.'
